EXPERIENCE

Lead Web Developer

Actual Size

11/2021 - Present

- Collaborating with design and project management teams to complete projects to stakeholder standards and design specifications.
- Planning website development, and converting mockups into usable web presence.
- Performing upkeep on over 7 existing sites and platforms to reduce technical debt and improve usability.
- Implementing efficient coding practices and standards to optimize project performance and maintainability.
- Implementing new and improving existing features on a large-scale education platform with over 1 million users.
- Building projects of varying sizes, from single-page marketing sites to full platforms for a range of markets.

Instructor

Flatiron School

01/2021 - 11/2021

- Gave bi-weekly live lectures covering concepts in Ruby on Rails, vanilla JavaScript, React, and Redux to over 20 students.
- Offered personalized feedback and guidance to students to help them improve their coding skills.
- Conducted regular assessments via portfolio project reviews and code challenges.
- Monitored the progress over over 20 students and identified individual areas for improvement.

Technical Coach

Flatiron School

08/2020 - 02/2021

- Provided 1:1 lab support to students through chat and video calls.
- Resolved functional and test-related issues in curriculum labs.
- Identified and solved local environment issues.
- Identified patterns in student struggles and provided resources to address them.
- Managed a queue of up to 30 students at a time.
